

Why did the toad cross the road?...

Common Toads are thought to be disappearing from some sites around the UK. Thousands are killed crossing roads each spring as they make their way to breeding ponds that they have used for generations.

Can you spare some time to help local toads cross a road?

Volunteers are needed to help a local '**Toads on Roads**' patrol on mild evenings anytime between mid February and the end of March.

If you are interested in helping ensure the survival of this local toad population please contact:

.....
All you'll need is warm clothes, buckets and torches and you can take part as little or as often as you like!

Toads on Roads is a national scheme co-ordinated by the wildlife charity Froglife, supported by ARG UK.
