

Adder

(*Vipera berus*)

- You can spot an adder by the zig-zag pattern down its back
- Adders are our only venomous snake
- They eat mice and other small creatures
- They only bite when really threatened or when mothers are protecting their eggs
- They are very, very shy and more scared of us than we are of them!

Froglife is a UK wildlife charity committed to the conservation of amphibians and reptiles - working with people, enhancing lives together for a healthier planet. Find out more about our education projects and activities at www.froglife.org
