

FROG OR TOAD?

Below is a type of diagram called a Venn Diagram. There are different statements below to be entered into the correct areas, either statements true for frogs, toads or the area in between which will be statements true for both animals. Can you write the statements in the correct areas?

- | | | |
|----------------------|----------------------|---------------------------|
| Are Amphibians | Dry warty skin | Have a brain |
| Hatch From Eggs | Have a Backbone | Poison glands behind eyes |
| Lay eggs in clusters | Jump | Have teeth in top jaws |
| Bulging eyes | Have a heart | Adults have lungs |
| Slimy, smooth skin | The young have gills | Have no teeth |
| Lay eggs in chains | Walk | The young live in water |
