

Slow Worm

(*Anguis fragilis*)

- Slow-worms are actually lizards with no legs
- They look like snakes but are more shiny and can blink
- They eat bugs, like flies and slugs
- Female slow worms have dark stripes down their sides

Froglife is a UK wildlife charity committed to the conservation of amphibians and reptiles - working with people, enhancing lives together for a healthier planet. Find out more about our education projects and activities at www.froglife.org
